

We emphasize transparency and the sharing of ideas, knowledge, data and results.

We adopt safe practices

Help educate the public about biotechnology, its benefits and implications.

I will remain accountable to my peers and to society for my actions and for upholding these standards.

Playing with biotechnology is O.K.

We work to increase public understanding and use of scientific methods to promote decentralized research and citizen science.]

Tinkering with biology is a valid form of experimentation.

Advocate for the tools and knowledge of biotechnology to be more widely accessible.
